

PennOhio

Waste Processing & Equipment

We appreciate the opportunity you have given us to meet and discuss your needs and our services. PennOhio routinely performs all the services outlined in the attached pullouts. Our facility has been designed to effectively handle all types of industrial, non hazardous waste including liquids, sludges and solids in drums or bulk.

PennOhio's ability to treat, store and dispose of non hazardous wastes coupled with our staff's technical expertise in hazardous waste management, makes The PennOhio Corporation your single source for total environmental management.

Customer service is tantamount at PennOhio. Our strong client base has been built on sound environmental management, cost effectiveness and an extremely high level of customer service. You will see us in your plant, getting to know your processes and your waste streams, as you get to know us. It follows then that answers to your questions and solutions to your problems are a phone call away. PennOhio is personal service from real people.

PennOhio

Waste Processing & Equipment

NON HAZARDOUS WASTE MANAGEMENT

We have designed our plant and built our staff to be “user friendly”. As the generator, you know your waste. Completion of a PennOhio Waste Profile Sheet can gain same day approval for your waste streams. Our QA/QC procedures confirm your shipment as it has been profiled. Stabilized, dewatered sludges and solids are ultimately managed to BAT Subtitle D Landfill or are recycled. Aqueous streams receive waste water treatment prior to discharge to POTW. Oils and oil based materials are recycled, re-refined into useable products.

HAZARDOUS WASTE MANAGEMENT

In the hazardous waste arena, generators face tremendous pressure: compliance with strict federal, state and local regulations; health and safety issues; and long term liability consequences. PennOhio assists hundreds of generators, government agencies and consultants in complying with tough, new hazardous waste regulations through a customized waste management program that safely and effectively addresses environmental liability/management concerns. PennOhio also helps generators utilize the regulations to their benefit. Often, generators are not using state, and federal exemptions that were designed to aid their specific industry or industrial classification.

SITE REMEDIATION

Our staff has a wealth of experience with many types of site remediation. Our specialized waste processing, handling and transportation equipment provides an array of options for dealing with your unique clean up situation. We can provide a full range of services, from site investigation and waste sampling/characterization to packaging and manifesting, then transportation to PennOhio and or other suitable, approved disposal facilities. The PennOhio staff has experience in every aspect of clean closure of industrial facilities and clean up of abandoned sites.

Waste Processing & Equipment

DRUMS AND LAB PACKS

Our experience and trained field technicians will handle all of your hazardous and non hazardous drums. We can provide waste identification, sampling, analysis, drum labeling, inventories and scheduled pick ups. Complete lab pack services including characterization/classification of laboratory chemicals including unknowns is available.

RCRA EMPTY CONTAINER MANAGEMENT

With adherence to 40 CFR 261.7, and 261.33(e) and D.O.T.'s 49 CFR 173.29, PennOhio will accept and recycle your used steel, plastic and fiber drums.

TANK CLEANING

PennOhio provides complete tank cleaning services, adaptable to a wide variety of needs. We have a full range of specialized equipment and expertise to provide a safe and complete operation. Any sludges/residues generated are managed off-site to provide a turnkey job.

TRANSPORTATION

PennOhio operates a fleet of specialized vehicles in conjunction with our audited sub haulers, to meet various waste handling needs including wet and dry vacuum trucks and tankers, roll-off trucks and boxes, dump trailers, flat beds, box trailers and straight trucks with lift gates. All vehicles are approved by appropriate state and federal agencies for the transportation of hazardous and non hazardous waste.

PROCESS EQUIPMENT

PennOhio's staff has aided many companies in reducing or eliminating waste stream by making in plant or process changes/modifications. As buyers and sellers of new and used equipment, PennOhio can economically help our clients develop treatment, filtration, adsorption and other unit operations in an effort to eliminate or reduce waste generation.
